- Auto-Dimmer!
- Audio speakers!
- USB-HUB!
- 1000 nits!

Support: Drawing

## New on 30.09.2022:

- 1000 nits instead of 600

**New:** LED-Backlight-Technology, with optimized color saturation enabling particular high and shining display. The scale of displayable color nuances is increased by 45% because of the new technology. Conventional LCDs are based on CCFL backlight, which can display approx. 72% of the standard color scale of NTSC (National Television Systems Committee). With LED-Backlight-Technology 104% of the NTSC-color scale can be displayed. This results in displaying in a highly realistic manner.

The new CTF-846 TFT-Display is the latest development from CarTFT.com and comes with many nice features. In any case it is the ideal display- and input-unit for your Laptop, CarPC or HTPC. With the touchscreen functionality you easily can control your PC. The briliant VGA-display ensures a maximum readability and sharpness.

The device has an integrated speaker, a rear camera input and the Auto dimmer sensor in the front will enable perfect viewing pleasure also during the night.

On the rear side you also will find a free USB-port, which you can use with any USB-device you want. The connection to the PC happens with the same cable, which connects the touchscreen!

AC-Adapter for home usage and a car cigarette lighter adapter is included as well as the IR-remote-control unit and the extra long (2,5 meters) All-In-One connector cable.

The CTF-846 can be used with any PC/MAC with VGA- and USB port.

8" digital
4:3 wide TFT screen
2400x600= 1,440,000 dots
800x600
